## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 are drawn to an apparatus, classified in class 606, subclass 61.
- II. Claims 30-32 are drawn to an apparatus, classified in class 606, subclass 72.
- III. Claim 33 is drawn to a method, classified in class 606, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of a pedicle screw has separate utility such as use in anchoring another bone in the body. It is not required that the pedicle screw use the bone collet to anchor another bone. See MPEP § 806.05(d).

Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method does not specifically require the apparatus of group I. It could be used to secure another object such as a pipe. Likewise, the apparatus could be used in a different method.
